SPECIFICATIONS:

- **SYSTEM REQUIREMENTS:** Microsoft® Windows Server* (NT, 2000, 2003, Server 2008 R2), Microsoft IIS 5.0 or higher, 512 MB of RAM

WEB-BASED APPLICATION ENABLES AUTHORIZED EMPLOYEES OR TENANTS TO PRE-REGISTER VISITORS ONLINE

- **Streamlined visitor check-in process** – Simple, customizable web browser form for pre-registering individuals or groups of visitors by authorized employees.
- **Enhanced facility security** – Provides full control over visitor access by granting access to authorized eAdvance™ users only, and utilizing a rules-based system to determine if further approvals are required.
- **Unlimited-user license** – Any or all employees or tenants can be authorized with one server license.

HID Global's EasyLobby® Visitor Management Solutions provide comprehensive, enterprise-class visitor registration, badge printing, tracking, reporting, asset and package management, web-based pre-registration, and employee/contractor time and attendance.

As part of its Secure Visitor Management™ software portfolio, HID's EasyLobby eAdvance™ solution enables authorized employees or tenants to quickly and easily pre-register visitors online, before a visitor arrives.

The solution is tightly integrated with Secure Visitor Management to enable authorized employees or tenants to pre-register guests via the Internet or intranet through a simple web browser. No training of employees is required.

Since the visitor can be pre-registered through eAdvance, the receptionist or guard can simply scan the visitor's license when they arrive (or quickly consult an on-screen list of pre-registered visitors), and with one mouse click, the visitor is checked in and the badge is printed.

In addition to its easy-to-use functionality, eAdvance includes several advanced features, such as the ability to provide guest lookup and email confirmations to the host employee or tenant and visitor.

eAdvance provides users a quick and efficient means to manage the visitor registration process and greatly reduce the check-in time and potential lobby congestion.
